

Streetbite

Discover the City's Best Flavors

Rinzin Sherpa

The Hunter's Struggle

We've all been there: wandering the streets hungry, unsure where to go.

- 🍴 **Hidden Gems stay hidden:** The best vendors often lack a digital footprint.
- 🍴 **Hygiene Anxiety:** No way to know if a stall follows safety standards.
- 🍴 **Cash Chaos:** "Do you take card?" is often a gamble.

Meet Streetbite

Your personal compass for the urban food jungle.

What's Inside

Live Map

Real-time tracking of mobile carts and stalls. Never miss your favorite vendor again.

Verified Ratings

Community reviews and official hygiene scores you can trust before you bite.

Digital Pay

Seamless cashless payments via QR code. Fast, secure, and coin-free.

Crave & Explore

Visual Discovery: Browse mouth-watering photos uploaded by the community.

Smart Filters: Sort by "Spicy", "Vegan", "Budget", or "Open Now".

Navigate: One-tap directions walking you straight to the aroma.

From Hunger to Happiness

Search

Input your craving or
browse nearby.

Verify

Check ratings &
hygiene score.

Locate

Follow live GPS
directions.

Enjoy

Eat, pay digitally, and
review.

Join the Tribe

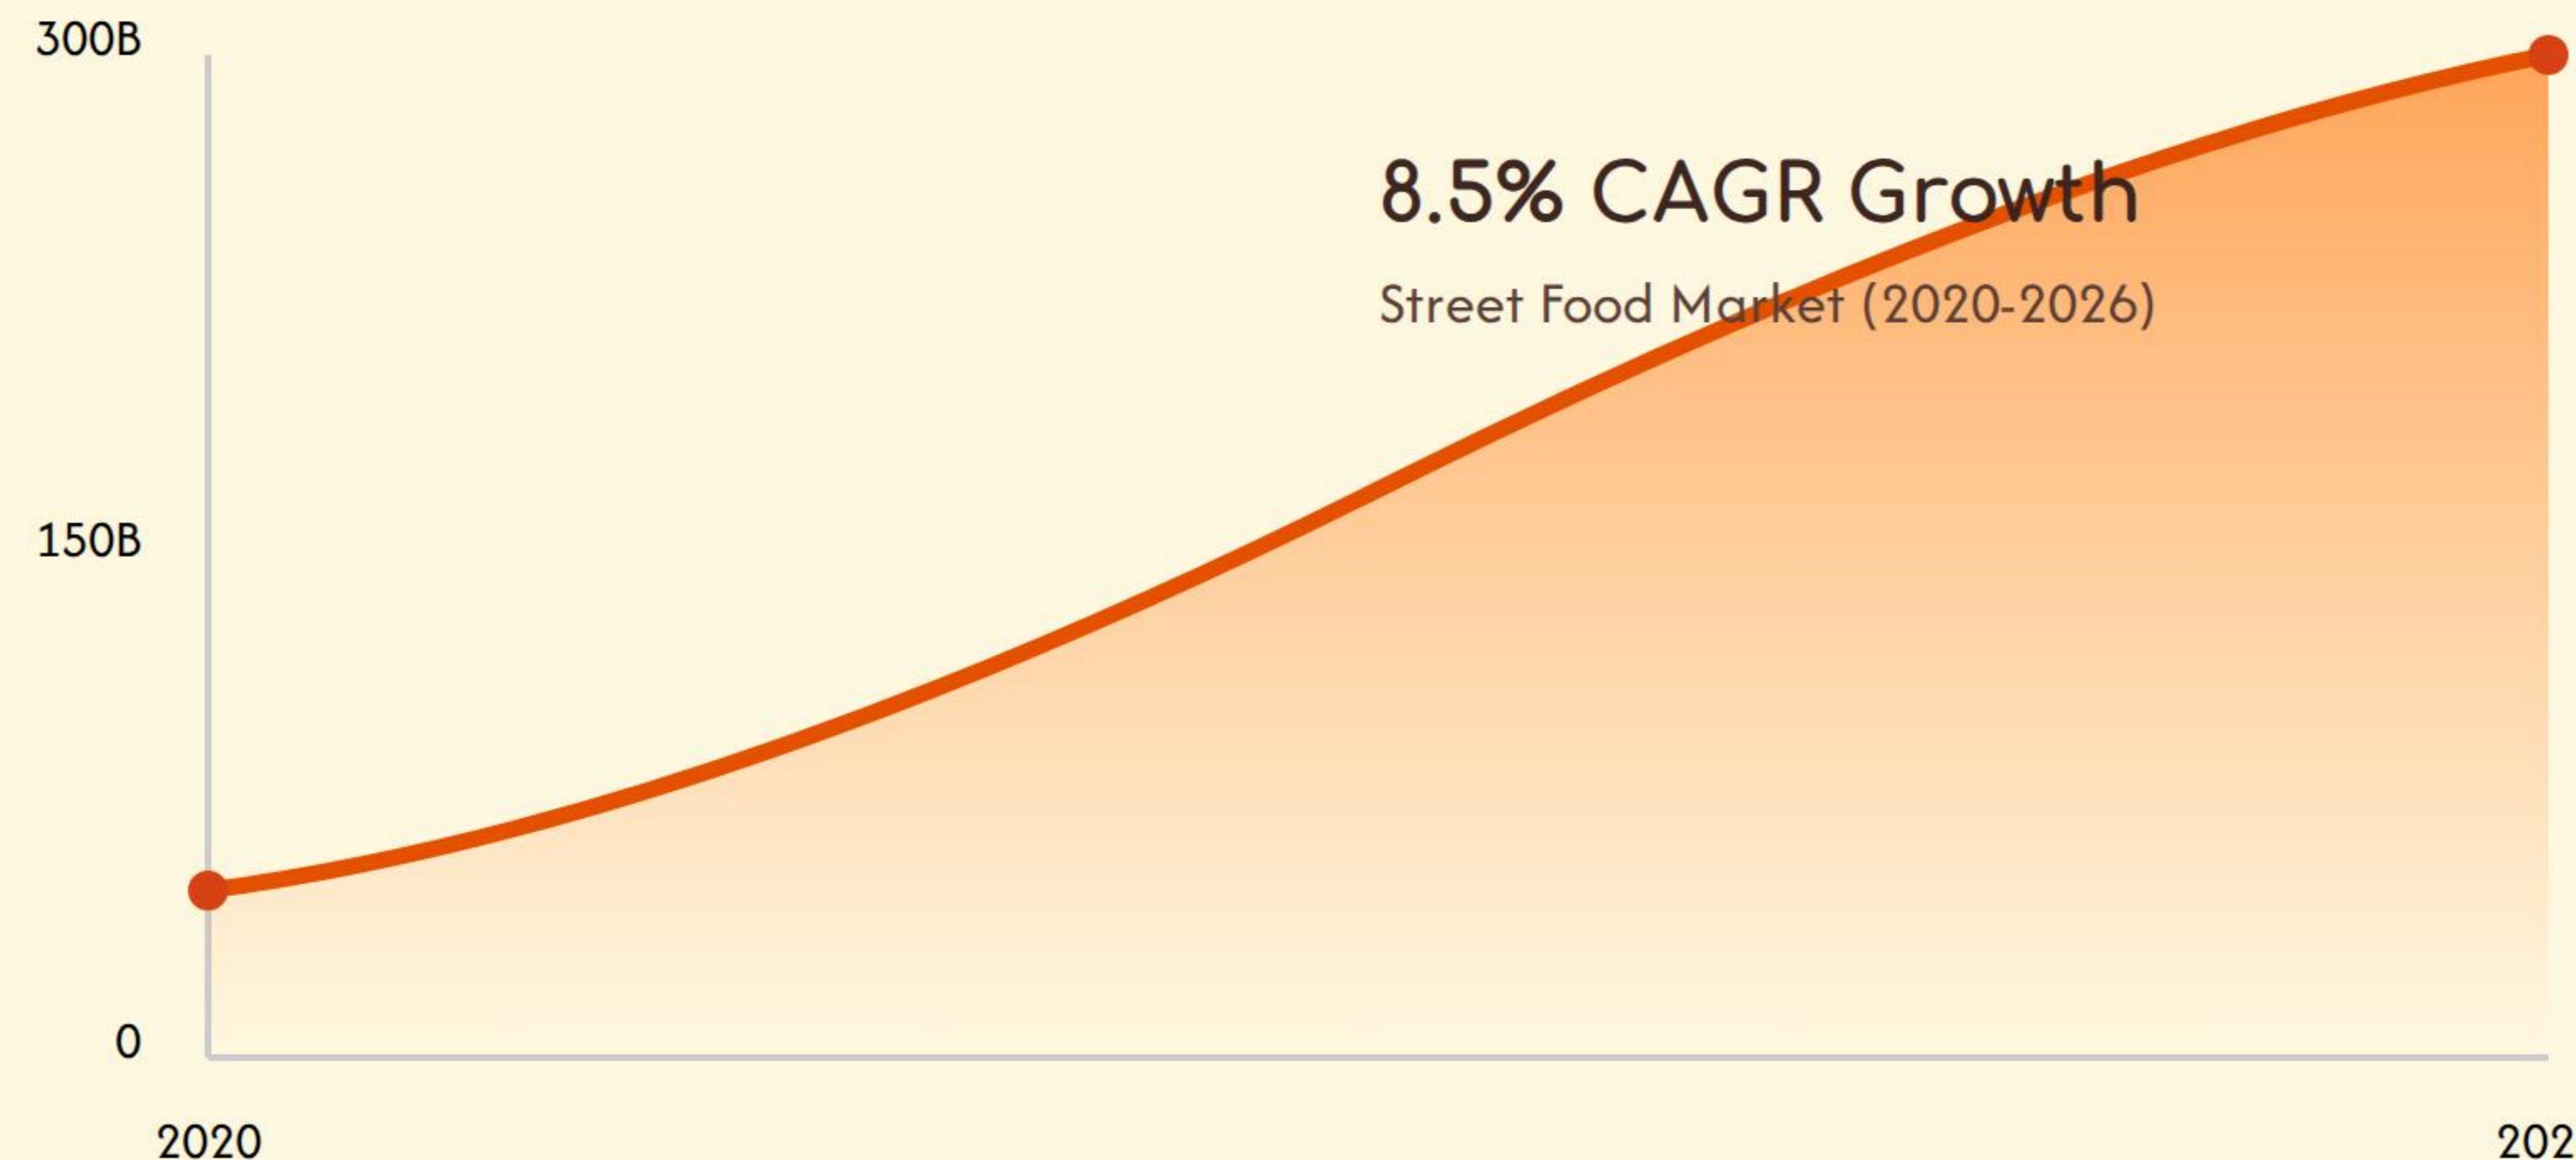

Social Eating

Street food is better together. Create lists of your favorite spots and share them with friends.

Earn "Foodie Points" for every review and photo you upload, unlocking discounts at partner stalls.

A Growing Feast

The global street food market is projected to reach colossal heights, driven by a desire for authentic, local culinary experiences.

Fueling the Platform

Premium Listings

Vendors pay for boosted visibility
and analytics.

Ad

In-App Ads

Targeted promotions for local
beverage & food brands.

Delivery Fees

Commission on orders delivered
via our partner fleet.

Smart Matching Algorithm

How We Suggest Food

Our recommendation engine doesn't just look at distance.

We weigh factors like **user cravings**, **vendor hygiene ratings**, and **current popularity** to calculate a unique "BiteScore" for every vendor.

```
function recommend(userLoc, craving) {  
    vendors = db.nearby(userLoc, 2km);  
    ranked = [];  
  
    for (v in vendors) {  
        score = 0;  
        // Closer is better  
        score += (1 / dist(userLoc, v.loc)) * 40;  
  
        // Safety first  
        score += v.hygieneRating * 30;  
  
        // Match the mood  
        if (v.tags.includes(craving)) {  
            score += 50;  
        }  
  
        ranked.push({vendor: v, score: score});  
    }  
  
    return sort(ranked).descending();  
}
```
